

Melt Your Drum Contents Fast

When you need heat fast on your 55 gallon drum, we recommend a full-coverage insulated drum heater. These drum heaters have a high-watt density, increasing the melting speed and are fully insulated, trapping the much needed heat.

The Facts

- Wraps-around Drum for the Ultimate Uniformity and Quick Heat
- 1 Inch Thick Fiberglass Insulation
- EZ-Dial Thermostat Built-in up to 425°F (218°C)
- Patented Ground for your Safety
- Designed for Indoor Use
- Dielectric Strength over 2000 volts
- Long 6ft Power Cord
- 120 or 240V
- Available for Metal and Plastic Drums

Easy Installation and Removal

Simply wrap the heater around the drum and snap the VECLRO® closure for a perfect fit.

| Gallon Size | Wattage for Plastic | Wattage for Metal | Part Number for Metal | Part Number for Plastic |
|-------------|---------------------|-------------------|-----------------------|-------------------------|
| 55 | 750 | 1600 | FGDHC55120 | FGPDHC55120 |

Useful Accessories

Drum Cover Insulator- Fits on top of drum for preventing even further heat loss.

| Part Number | Description |
|-------------|------------------------------------|
| FGDC55 | Drum Insulator Cover for 55 gallon |
