

PROTHERM™ has many heaters and systems throughout the filter industry. A number of the manufacturers have multiple systems which have successfully increased line speeds, improving quality and in less space than previous processes. A few of the applications serviced are **plastisol pre-gel** and **full cure**, and **media pleat setting**.

With our proven experience and testing facilities, we would like to assist you in working with new applications or showing how the benefits can help your requirements.

Contact a PROTHERM™ Applications Specialist for assistance. 1-800-793-2077.
