

PROTHERM™ has hundreds of heaters in textile and converting applications, each custom designed for proven quality and reliability. Utilizing our highly efficient **F, FS, and FSA Series Heaters** with the precise combination of airflow, we are able to meet your particular application need. Using electric infrared heat we are able to finish your process in a small amount of space. With our experience processing webs ranging from 8" to 252" wide at speeds of 5' to 850' per minute, we would like to help you choose the correct heating method for your process application.

Contact a PROTHERM™ Applications Specialist for assistance. 1-800-793-2077.
