

The PROTHERM™ Infrared Heater was designed specifically for the demands of the wire and cable industry and for curing extruded rubber and synthetic shapes such as medical tubing and gasket shapes. The **Infrared Heater** can be mounted either horizontally or vertically, and heaters can be stacked end to end and have intermediate exhaust ports added. The hinged construction makes line thread-up easy.

Available in diameters of 2" to 10", the **Infrared Heaters** are made with PROTHERM™ unique fast response long-life elements mounted to proprietary ceramic cylinders. This construction offers unequaled efficiency.

Unique **Infrared Heaters** have been built to 48" diameter.
